EXPERIENCE

SlidesAI.io | Fullstack Engineer

June 2024 - Present

- Contributed extensively to the agentic chat experience for creating presentations and implemented the credit system.
- Launched an AI-powered PowerPoint add-in that creates presentations from topics, scripts and websites; ranked second among AI-powered add-ins in Microsoft Marketplace within two weeks.
- Evaluated workflows across 2M+ presentations using prompt iteration and Promptfoo, improving positive user feedback to 18-20% over two months.
- Rebuilt request handling with Cloudflare Queues, Durable Objects and WebSockets, reducing server overhead by 50% and delivering real-time status updates.
- Implemented analytics-driven drip campaigns and user-requested features for a Google Slides add-on with 15M+ downloads.
- Built Interactico for live Google Meet polls and quizzes (13K+ downloads), with subscription billing, analytics and user feedback flows.
- Built a WordPress/GraphQL/Next.js CMS with Cloudflare KV, cutting build time for 170 blog pages from 17 to 3 minutes. Shipped features and production fixes in Linear-managed sprints.

9AI.in | Frontend Engineer Intern

March 2024 - May 2024

Built and shipped the frontend architecture and core interface for an AI-powered video lip-sync application using React and TanStack Query.

SELECTED PROJECTS

Agent Comics / Comic Studio | Website | App Store

Created an AI comic-making product for iPhone and iPad with guided story planning, character references, full-page artwork generation and downloadable pages.

Garden Home | garden-home.pratikdevdas.com

Created an AI-driven architectural visualization project exploring residential interiors, materials and lighting through still images and walkthroughs.

Email Classifier | [Project overview](#)

Built Gmail categorization using OAuth, GPT-4o mini and LangChain prompt chaining, with LangSmith observability and a Figma-designed Tailwind interface.

SKILLS & TOOLS

Development: JavaScript, TypeScript, React, Redux, TanStack Start, React Query, Next.js, Remix, Radix UI, Tailwind, GraphQL, Node.js, Express, PostgreSQL, OAuth, Jest, Cypress

AI & Cloud: LangChain, LangSmith, Promptfoo; Cloudflare Workers, KV, Queues, Workers AI, Durable Objects, Observability, AI Gateway, Workflows, Agents; WebSockets, Docker

Tools: Figma, Cursor, Linear, Notion, Claude

EDUCATION

B.Sc. Computer Science | KIIT University

August 2021 - August 2024
